PRESSURE RATING: WCB and CF8M
2000 PSIG @ 100°F W.O.G.—1/2" - 1 1/4"
1500 PSIG @ 100°F W.O.G.—1 1/2" - 2"
Water, Oil or Gas

Socket weld end modification note: Threaded end connections that are modified to socket weld end connections will result in reduced pressure rating of the valve due to reduction of end cap wall thickness. Use of the factory furnished socket weld end cap option should be considered to retain the stated valve pressure rating.
