

INTERNATIONAL STANDARD VALVE INC.

ISV

ISV TRUNNION BALL VALVES FOR THE GAS INDUSTRY

PIPELINE TRANSMISSION,
MID-STREAM,
NATURAL GAS DISTRIBUTION

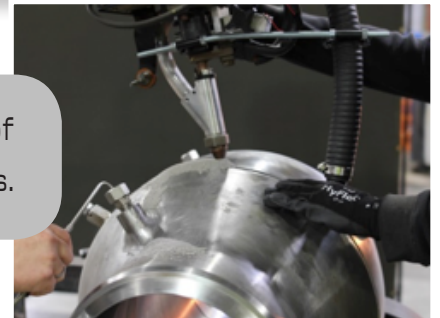

ISV's welded body trunnion, Series BT3GU, is our domestically manufactured welded body trunnion available in flanged or butt weld end connections, ideal for buried service with many inherently superior design features. We of course manufacture conventional flanged end valves as well.

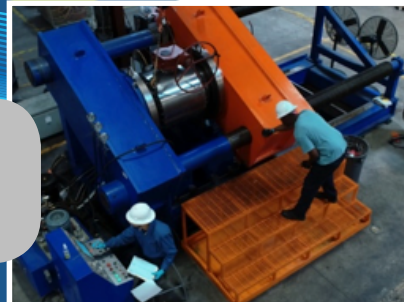

ISV series BT3EU is our split body side entry design offered from 2"-42" ANSI Class 150-2500. The BT3EU offers many design features as well that set us apart from our competitors.

ISV's in house automatic welding machine, capable of welding up to 42" valves.

The largest hydro test stand gives us the capability of assembling and testing up through 42" valves.
